String theory on AdS3 with RR fluxes

Friday, 2 October 2009 16:35 (35 minutes)

I will review recent progress concerning the quantization of strings in AdS3S3 with RR fluxes. In particular I will present the current algebra of sigma models on supergroup manifolds with vanishing dual Coxeter number. Then I will explain the construction of the generators of the spacetime symmetry algebra for string theory in AdS3S3.
